

Compressors

We offer market-leading compressors of the highest quality. In our wide range you will find compressors from 2.2 kW to 1300 kW. These compressed air compressors come in various configurations such as oil slurry, oil-free (screw, piston and scroll), turbo and lamellar. More information can be found in the brochures, which can be found in the specific sub-pages.

Our goal is to become the market's obvious choice when it comes to the supplier of compressors. We do this by not compromising on quality and offering service, maintenance and repairs on our own and foreign compressor products. More about our services and maintenance agreements for compressors and other products can be found in the brochure under the services / services page.
