

Pulveriser

We are a pioneer in the field of manufacturing Pulveriser with modern technology. We design and manufacture our pulverizers with the flexibility to easily evolve with your business. Your need for higher productivity, better end product surface quality, and shorter molding cycles has resulted in pulverizers that deliver maximum efficiency with minimum waste or down-time.

Unique Features:

- Complete Robust & very sturdy structure for sound & vibration free operation
- Low power consumption
- Uniform Production & Increase in Output Capacity
- Total Dust Free Environment
- Very effective water cooling system with jacketed arrangement
- Compact & Highly Efficient, Low maintenance
- Main Grinding disc of superior grade material for longer life.
- Cooling provision for Stationery disk, Mill body, duct line, Bearing Housing
- Vibratory screen for fine re- pulverizing of course materials
- Vibro feeder / Auto Servo control feeding system
- Temperature monitoring of Disc Mill & thereby ease of control on feed rate
- Powder coated Electrical panel with dust proof construction equipped with all safety features
- Economical production cost with consistence output quality
- Labour Savings with minimal man power
- Complete Design with flexibility & perform fine Pulverizing of wide range of plastics materials like LLDPE, LDPE, HDPE, CROSS LINK, PVC, PBT, ABS, Nylons, Polyester and Other Polymers
