

Duplex Strainer

We are well-known Manufacturer, Exporter and Supplier of **Duplex Strainer**. Duplex Strainer is designed for use in fluid handling systems where the flow cannot be shut down for filter cleaning. The range of Duplex Strainer is precision designed and constructed with duplex filters that ensure complete removal of any type of foreign particles from the system. Precision functioning of Duplex Strainer also helps in enhancing the overall service life of the pumps, valves and other flow control instruments.

Specifications

- **Pressure, Temperature Rating** : 50kg/cm², 300deg C
- **M O C** : CS, SS, , Hastelloy, Inconel, Duplex Stainless Steel, Super Duplex, Monel, Alloy20, Alloy400, Alloy625, Alloy825, Titanium, SS904L, Nickel, Gun Metal
- **Size and Range** : 15 NB to 200NB and mesh from 10 to 6000microns
- **Process connection** : Any international standard
