

## Fatka Machines

Shri Viratra Engineering is a substantial food processing equipment manufacturer. We have been making untiring efforts and commitment to innovation. Our fatka machine is used in the Modern Dal Mill Plant .Fatka machine is used to break down different types of pulses like red lentils (Masoor), (Arhar Dall), black lentils(Urad Dall), chickpea(Chana Dall), etc. into perfect and definite shapes.

Our machines are manufactured using the best quality components. It may be specified as it has four high-density fiber strips that lead to a minimum dissipate rate. We use heavy-strength material to maintain the sturdiness of our machines. Our machines are highly efficient and have fast throughput of 2 to 3 tons/hour. Features: High durability and low maintenance, Fast processing, High quality bearings for Long life
