

Seamless Tubes

DL Fluid distributes wide range of cold drawn carbon and alloy steels seamless tube and pipes . We are specialized in hydraulic and fuel injection tubes of various sizes and thickness.

DL Fluid power company is authorized distributor of SAINEST TUBES PVT LTD. Hydraulic Tubes can be supplied under conditions according to DIN 2391 Part 2 in various grades mentioned below. Fuel Injection Tubes can be supplied in lower tolerance than mentioned above. It can be supplied according to conditions mentioned in ISO-8535.

Considering the importance of outside and inside surface of tubes for fluid power industry, DL is providing tubes that are free from scale, rust, seams, laps. Tubes can be pickled, passivated, phosphated, zinc-plated, oiled or varnished for rust prevention and long storage. They are stenciled at the ends and end capped.

Applications

- Pipe Lines for hydraulics.
- Pipe Lines for lubrications.
- Pipe Lines for pneumatics.
- Components manufacturing
- Fuel injections and oil pipes
- Break, clutch and fuel tubes
- Fabricated steel pipes oil pipes assembly and allied products

Seamless Tube

- Size range and tolerance of hydraulic tubes
- Grade of hydraulic tubes
