

Feeder

Apron Feeders

Description : We supply an exclusive range of Apron Feeders which is of very high optimum quality. We also offer heavy duty apron feeders of premium quality which are highly demanded by all. We are one of the highly renowned apron feeders manufacturers and exporters from India.

Rotary feeders

Description : The main function of a Rotary Air Lock is to regulate the flow from one chamber to another chamber while maintaining the air lock conditions. Good quality airlocks are required in the industry for proper dust filtration in cyclone and bag filter applications. Most important quality aspect for any rotary airlocks is to maintain radial and axial tolerances to prevent any air leakage.

Vibratory Feeders

Description : We are counted amongst the leading Vibratory Stock Feeder Manufacturers and Suppliers based in India. Our Vibratory Stock Feeders are widely used to stock a large amount of material at a time. With the help of optional chute/tray, the Vibratory Stock Feeder can continually feed the material to vibratory bowl feeder without making any kind of lumps or and jamming the material. An opening on the top of our Elevator Hopper Feeder assures efficient loading of the materials.
