

Industrial Valve

We manufacture Industrial Valve, which is extensively used in cement, power, chemical, construction, petro-chemical, marine and related sectors. Good quality of raw material used during production is the speciality of our gamut. The range of material being produced includes stainless steel, cast carbon steel, alloy steel, cast iron, gun-metal, forged steels and others. These valves are suitable for water, air, oil, liquid gas and petroleum gas etc. Moreover, it can be easily customized in compliance with client necessity and is delivered on time. Catering to the requirements of various industries, our range is highly acknowledged for robust design, great performance, low maintenance and cost effective price.

Praised For

- Made from top quality raw material
- Customization option

Materials of Construction

- Stainless Steel
- Cast Carbon Steel
- Forged Steel

Widely Used In

- Cement Industry
- Marine Sector
- **Application** : Industrial
- **Material** : Metal
- **Resistivity** : Rust Resistant
- **Size Range** : 8 mm to 900 mm
- **Durability** : Long Life
- **Surface Finishing** : Polished
