

## Storage Tank

### Description:

We are among the prestigious organisations engaged in manufacturing and supplying a quality range of **Storage Tank**. Ideally used for holding liquids like chemical water, the interior and jacket of these tanks are manufactured to ensure unvarying flow circulation of the heating fluid in the jacket. Our professionals make use of quality tested material and follow industry set norms while manufacturing these storage tanks. We also offer these storage tanks in custom-built range, as per the requirements of the clients.

### Features:

- Rigid construction
- Durability
- Corrosion-resistance
