

Dumper Placer

Dumper Placer System is mounted on LCV, MCV and HCV Truck Chassis and depending upon the container capacity. It is meant for all small or big Municipalities, specially for populated areas.

Salient Features The garbage / refuse is directly collected into the containers which are placed at the various collection points in the busiest and most thickly populated areas of the city. The System with the loaded container is transported to the dumping site and the same is tipped hydraulically to discharge its load. The available suitable container capacity is of 7.0 m³, 5.0 m³, 3.5 m³, 2.5 m³. And 1.5 m³. It is available in single and twin bin system.

Advantages : It is a unique, highly productive, easy operation and low maintenance, hygienic system to help in keeping a city clean. It is an effective and flexible method of handling debris/garbage/refuse and discarded building materials. It is simple, easy and convenient to operate.
