From Our Directors Desk

"Being on par in terms of quality & price only gets you into business but After Sell Service wins you the Business."

Mr. Naresh Thole (Jain)

About us

Keeping promises since 2010

We have been keeping promises since 2010 with utmost perfection. This job of fulfilling commitments made to clients at the time of business transactions pertaining to swift delivery, easy payment options and strict adherence to international quality norms, is brilliantly performed by our aurangabad based company. In both national and international markets, we are highly praised for serving quality-assured non metal engraving cutting machine, fiber laser machine, fiber laser spares and much more at competitive rates. Where is the difference: Difference between us and our competitors lies in various things. There are a lot of factors in which we have successfully proved ourselves better than the other companies in the markets:

- our business entity do not follow obsolete way of handling business relationships. Customers are free to contact us anytime through different modern means of communication. Computerized maintenance of records ensures safety and zero customer-grievances.
- we adopt customer-centric work ideology. Clients are updated from our end about everything new going within the four walls of enterprise.
- our business entity provide complete information about usage of offered line that includes fiber laser machine, fiber laser, spares etc., to customers. We also solve clients' product related queries on time.

Different Types of Laser Engraving & Cutting Systems available

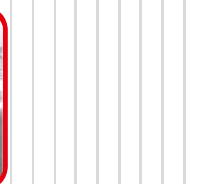

Different models are available depending on individual size of marking requirements. Laser engraver uses a computer unit and automatic operated marking laser beam ...

MarkSys Co2 Laser Engraver and Cutter Basic Principle

The laser engraver and cutter (EC)... combined with computer, motion control system and electrical precision machinery techniques. It is a Co2 laser marking and cutting equipment which can engrave (mark) and cut characters, artwork and designs as per requirement, on the work piece (non-metal materials only) permanently. Computer controlled laser head moves in X-Y plane and engraver and cut on the certain location of work piece desired and located by us. EC can be used on plain surface and as well as circumference with the help of Rotary Device.

Some major special features of Marksys EC

- Robust and stable machine shell, with Quality material.
- Proved and widely used Corel/RD Laser system supported by Coral Draw and AutoCAD directly.
- MS sheet platform support for laser Honeycomb/Fence bed, for accuracy work.
- High Quality Tubes which give good 8000-10000 hours working life then regular glass tubes.
- LM Rail is of make Hiwin, which is famous for its Quality.
- Imported parts but structured as per Indian Handling Requirement.
- Good Quality Mirror and Focus, which is precise in result
- Less Maintenance and less service calls
- Toll free number for Prompt Attention and timely solutions
