

Dumpy Level

Product Details

Feature

Compact Design, Light In Weight

Condition

Good

Accuracy

2.33mm/Km

Clear Aperture

30-60 Mm

Magnification

0-20 X, 20-40 X

Minimum Focus

0-1 Mtr, 1-2 Mtrs

Automation Grade

Manual

Product Code

BL-276

Port

Ambala Cantt

Delivery Time

15Days

Packaging Details

Box

The dumpy level is an optical instrument used for surveying and levelling operations. It comprises of a telescope tube, firmly held between two collars and adjusting screws. The complete instrument is staged by the vertical spindle. The telescope placed on the dumpy level can be rotated amongst the horizontal plane. Relative elevation of survey points on the land can be determined through the dumpy level.
