

WTP Plants

The working principle of Effluent Treatment system is undertaken to be one of the most effective principles where a large amount of human friendly chemicals is used that is applied in the water to make it free from all the factors that might be harmful to human and aquatic life. This is an important part that can be highlighted that helps to highlight that the working principles vary in a number of ways, furthermore, with the service.

Category:

Description

Capacity (KLD)	100 KLD
Application Industry	Residential & Commercial Building
Air Blower Count	2 Blowers
Air Blower Power	0.5 KW
Treatment Technology	Mixed Bed Bio Reactor(MBBR)
Material Of Construction	Stainless Steel
Water Source	Commercial Waste Water
Control Module	Available
Automation Grade	Automatic
Deliver Type	PAN India, Outside India
Power Source	Electric
Warranty	1 Year
I Deal In	New Only
Installation Type	Complete Civil work with Installation
Treatment Stages	Preliminary Treatment
Country of Origin	Made in India
