

Drying Oven

We are leading manufacturer and exporter of **Drying Oven** and our product is made up of good quality. These lightweight ovens are designed to protect electrodes from atmospheric moisture which is readily picked up by the hygroscopic coating in low hydrogen electrodes. It can be used at the higher temperature and then brought down for regular storage. Portable ovens are light and easy to carry and the square shape gives the ovens greater stability vertically or horizontally.

Category:

Description

- Inner Chamber: Made up of MS.
- Outer Chamber: Made up of Thick Snow White color.
- Motor: 1 HP with strong shaft and fan blades to circulate Air inside the chamber.
- Controller: Digital controller with temperature setting facility along with Timer.
- Sensor: PT 100 sensors 4Nos. for accuracy in temperature indication.
- Maximum Temp: Up to 200 degree temperature.
- Temp. Accuracy: +/- 1 degree Celsius.
- Insulation: Glass wool insulation between two walls.
- U Type coils placed on the side walls of the Oven.
- Rating: 14 KW
- Supply: Single Phase supply
