

Ribbon Cutter

Introduction

Shri Krishna Ribbon Cutter is suitable for mixing dry powders & grits of different bulk densities used in the food, mineral, pharmaceutical, paint and chemical industries. It is a simple versatile mixer & grills which can also mix some wet material. Cutters of various designs are available to handle different materials. The mixer consists of a cylindrical shell inside which rotates a double helix shaft fitted with spiral inner and outer Cutters. During rotation of the shaft, the ribbons lift, convey and inter-mix the material to get a homogeneous mass in short intervals.

Discharge is from the bottom by a quick opening valve.
