

Plate Vibrator

Principle : Reciprocal Pressure generation Depth effort : 6 inch @ 400 vibrations / minute
(Direction of travel : Forwrd) Transmission : Through V-Belt or rotter shafts, Pully assembly
Prime mover : Good company make 2 HP Engine or 2 HP 2800 RPM 1 or 111PH Induction
electric motor with suitable starter respectively Dimensions : 24" x 30" x 30Weight : 50 Kg.
Approx.

Specifications

- Principle : Reciprocal Pressure generation
- Depth effort : 6 inch @ 400 vibrations / minute (Direction of travel : Forwrd)
- Transmission : Through V-Belt or rotter shafts, Pully assembly
- Prime mover : Good company make 2 HP Engine or 2 HP 2800 RPM 1 or 111PH Induction electric motor with suitable starter respectively
- Dimensions : 24" x 30" x 30
- Weight : 50 Kg. Approx
