

Auto Mobile Components

VALUE PLUS TECH SOLUTIONS is leading Supplier and exporter of Valve Guides and custom made casting parts for automobile and industrial engine applications. We take great pride in our skilled employees, who are well experienced and technically qualified to produce highest quality product.

Our CNC Turning & Milling machine as well as conventional SPMs is extensively capable of producing high quality machined parts from various metals & metal alloys.

Specifications:

- Materials: Any special Brass, Stainless Steel, Aluminum, Alloy Steel material compositions as per customer's requirement
- Threads: ISO metric, MM, PG, BSW, BSP, BSB, BSF, BA, NPT, NPTF, UNC, UNF, UNEF etc. Any threads as per customer's design
- Mfg. processes: CNC Precision Machining, CNC Milling
- Finish: Natural Polish : Nickel, Tin , Chrome And As per Custom Specification
- Processing Range: Customized
- Quality Accuracy: 20 to 50 Microns
- Additional Services: Sturdy construction, Resistance towards corrosion
- Industries: Automotive Industries, Marine Industries, Automobile Industries

We also have extensive expertise in flawlessly handling the demands of Automotive Parts that can be made available by us in different finish specifications as demanded by our customers. Featuring use of quality material during the construction stage, these manufactured parts also deliver exceptional overall performance as well as longer service life standards. Here, we make these available at competitive prices.
