Flexible Duct Connector

MAPRO make Flexible Canvass Connector is ideal solution to isolate duct or/and vibration produced by Air Handling Unit, Fans, Blower and other equipment when connected to air duct. Our canvass connection is constructed with the combination of Metal to Fabric to Metal. Made for industrial, commercial and residential application with special canvass cloth and aluminum construction frame.

Our flexible duct connector is a substitute for asbestos & convention canvass cloth. Since it is air tight and has some outstanding properties, it can be considered for almost any application requiring high temperature performance and fireproof result.

Features

- Air Tight.
- Withstand high temperature.
- Anti Fungal Properties.
- Flame Retardant Canvass Cloth.
- Emities minimum fumes when exposed to flames.
- High Tensile, Burst & Tear Strength.
- Withstand Severe effects of strong sun light.
