

Welding Fixtures Manufacturer

We are a well known manufacturer and designer offering a wide gamut of **Welding Fixtures**. These are fabricated using high quality raw material which is procured from reliable vendors

Stamping Welding Fixture

Fixture is used for Automatic Welding of Stamping of STATOR of Submersible Pumpset welding. 2 troches travel at time .High Quality Welding when used with "Quality Engg" make Fully Thyristorised Pulse TIG Welding machine or Inverter Based TIG machine.

Submersible Pump's Rotar Welding Fixture

Fixture is used for automatic Submersible Pump set Welding of Mild Stell Flange with Stainless Steel body pipe. High Quality Welding when used with "Quality Engg" make Fully Thyristorised Pulse TIG Welding machine or Inverter Based TIG machine.

Stainless Steel Tube Welding Fixture

Fixture is used for welding very thin Stainless Steel for making tube or S.S. Utensils. Minimum Length of tube can me 1' and thickness can be .025mm . High Quality Welding when used with "Quality Engg" make Fully Thyristorised Pulse TIG Welding machine or Inverter Based TIG machine.
