

Gas Cabinets

The EXCEL Gas Cylinder Gas Cabinets are designed to provide a safe and cost effective means to isolate hazardous gas cylinders from the surrounding work place. The cabinets, which can safely store 1-4 standard size gas cylinders, are constructed of 11 gauge steel to exceed code requirements.

We also supply cabinets for semiconductor grade gases sourced from world renowned specialist manufacturers after understanding your requirements.

Additional safety features include a large vent exhaust, louvered door panel to provide positive air flow, and an integral sprinkler that is activated in the event of fire. The adjustable cylinder brackets secure a wide range of cylinders, while the removable back panel enables the mounting of gas delivery systems and components.
