

Manhole Covers

We bring forth our clients a qualitative range of **Manhole Covers**. These are designed and manufactured using quality materials and in accordance with the set industry standards. Our range is considered as non-sparking low pressure manhole covers and provides easy access to low pressure storage tanks.

Benefits:

- Robust construction to cope with regular use
- Range of size and materials to suit a wide range of application
- Non-sparking feature, provided by the use of Nitrile rubber or PTFE insert

Principle of Operation:

These covers provide access to tanks for maintenance and cleaning purposes. The manhole is secured by a transverse beam, which is attached to the center of the cover. This ensures even distribution of the holding down force to form a gas tight fitting.

Physical Attributes:

- **Size:** 20", 24" or special as required
- **Process Connection:** API 650 (20" and 24")
- **Materials:** Carbon Steel or special as required
- **Insert:** Nitrile/ PTFE.
- **Pressure Setting:** <2.5 psig

Ordering Code:

Model	Size	Process Connection	Material	Insert
100-20-132 (API MH 100)	20"	API 650 flange	Carbon Steel	PTFE insert

After Sales Support:

We also provide clients with comprehensive spares support and term preventative maintenance schemes. These are offered to clients with the help of our product-trained technicians who work as per the requirements of our clients.
