

Dust Collector

Bag Filters ensures recovery of particulate substance from exhaust gas is essential for two aspects of the industry i.e. to avoid the problem of pollution and recovery of finished products raising the plant yield.

We offer a full range of bag house designs and media choices to solve the toughest pollution control problems involving high temperatures, pressures and corrosives.

This equipment's filters the contaminated air and provides clean air. These equipment's are widely demanded in industries such as Food, Cement, Steel, Power, Chemical, Sugar & Distilleries and Paper & Pulp

Technical Specification:

- Range 400 CFM to 30,000 CFM
- Top Removal design easy to remove the bag
- Online Cleaning with steady pressure drop
- Temperature Range upto to 360 °C
- Variety of Filter Media available as per the need of the application
