

Pulverizers

Pulverizer is a high efficiency, economical unit for dry grinding to any specified fineness up to 250 - MIRON mesh as well as for smooth blending operations. It is a close clearance, high speed, and compact Mill ideal for grinding a wide range of abrasive, nonabrasive and fibrous materials. As the grinding action is controlled mechanically the accuracy of the particle size is maintained.

Technical Specification:

- High operational fluency
- Sturdy construction
- Easy to operate
- Accuracy in the output particle size maintained.
