

Slide Gates

Slide gate valves are fabricated in range of sizes, types and forms to meet diverse needs of varied industrial applications.

These slide gates are the best choice for handling dry material in gravity flow or low-pressure applications. This gate is available in a wide variety of configurations including rectangular sizes, Circular and customer specific.

Technical Specification:

- Sturdy construction
- Resistant to wear and tear
- Accuracy in open / close
- Leakage proof
- Size 4 Inch to 30 Inch
- Choice of multiple options of operation - Manual, Pneumatic and Motorized actuation
