

Hoists

Hoists are the heart of EOT Cranes & the standard versions of these hoists manufactured by us are with low headroom and electrically operated trolleys. Pegasus Hoists technology is at par with world's best Electric Wire Rope Hoists.

Optionally, these Hoists/Crabs can be configured to function at lower speeds, usually 1/10 to ½ the normal lifting speed of standard hoists, these hoists are very effective for applications where precise movement is required such as components assembly, machine shop, injection moulding etc.

These Hoists can also be manufactured to meet Flame Proof specifications where the application demands such as in Hazardous Working Area, Explosive Work Environment, etc.

Salient Features of Pegasus Hoists / Crabs

- Compact & Proven Design with guaranteed customer satisfaction
- Hoists are Designed as per latest IS standard i.e. IS:3938
- Operation through pendant push button and radio remote control options
- Standard lifting height and also custom built according to customer requirements
