

Water Tanks

FEATURES

- High Density Polyethylene
- Food Approved Colour
- Double Layer
- Capacity:300 / 500 / 750 / 1000 liters
- Blow moulded
- Unbreakable
- Leak Proof
- Strong & Durable
- Light weight
- Economically feasible

PRODUCT DETAILS

- 10 times stronger than other reputed brands of RotoMould Water Storage Tanks
- Airtight threaded lid ensures content of tank is free from dust & Files.

UNIQUE STRUCTURED BODY

Light weight, well-balanced body supports stability. We play safe ensuring the highest standards with advanced solid structure, making sure that there is no compromise when it comes to your Home.

SUPREME AIRTIGHT THREADED LID

- Airtight screwable lid
- Keeps water fresh
- Keeps dirt and files out
- Does not blow in windy days.

BODY RIBS

A bolder front ribs, muscular styling, a strong lower body that looks apart, striking new threaded lid makes it a masterpiece.

PLUMBER FRIENDLY

Multi outlet option along with inlet and overflow configurations help plumbers in easy connection.

MORE STRONG

Advanced solid Monocoque structure with bolder ribs support stability and reduce bulging when the Water Storage tank is full.

HYGIENIC

Food Grade HDPE material ensures that the water does not get contaminated when in contact with the water.

KEEPS WATER FRESH

Supreme airtight threaded lid ensures that the content of tank is free from dust and files.

UNIFORM WALL

The latest evolution of blow mould technology goes a step ahead of its predecessors. It re-examines the frame structure with consistent wall thickness and thereby allows even more effective balanced weight of whole Water Storage Tanks.
