

Air Compressors

EMMAAR Reciprocating air Compressors are available for all applications in diverse industries. The compressors are manufactured with advanced technology for high operating efficiency and conform to the finest quality standards and stringent quality control tests at every stage.

EMMAAR air compressors need minimum maintenance and are backed by efficient after sales service.

SPECIAL FEATURES:

Piston: Automotive type low expansion aluminium alloy

Cylinder: Special graded cast iron deep finned for quick heat dissipation

Valve plates : Special stainless steel material. High operation efficiency

Crank : Made of alloy steel and dynamically balanced with bearings

Lubrication: The unit has splash type lubrication

Range : upto 20 HP at 12Kg/sq.cm working pressure. High pressure models are also available

Note: Oil free air compressors are available
