

Goods Lift

We have achieved paramount success with Flameproof Goods Lift in the market. These are mainly used to lift steel plates, blocks, press moulds etc. and load / unload in machines during handling operation. They can hoist moving iron blocks and other magnetic material. They are easy to operate and safe to handle and hence are widely used as lifting devices in factories, docks, warehouses and transportation industries. By using them, one can improve your working condition and increase the working efficiency.

Features

- **Safe to handle.**
- **Hoist moving iron blocks**
- **Negligible maintenance**
