

Zinc Casting

KEVIN METAL CAST is a well established manufacturer exporter of high precision zinc castings. The zinc castings offered are best for high volume, net-shaped, tight tolerance metal component manufacturing. Zinc being the easiest alloy to cast, offers high ductility and good impact strength. It can also be easily plated. Thus making Zinc castings economical for small parts like building hardware, buttons and luggage fittings, electrical switchgear parts and decorative artware. Making the best utilization of our facility we cast all the primary zinc alloys used in casting.
