

# Auto Industry

---

## PRODUCT DESCRIPTION

The Auto Industry is growing at a fast rate in Gujarat and neighbouring areas with very high local demand. A number of national and international auto manufacturers are moving/ starting new plants near Rajkot.

Aluminum Castings are required in many industries. This type of casting has successfully replaced iron casting as it reduces component's weight by half. Various auto producers are looking for fields where they may replace iron parts with aluminum parts. Some of the vital features comprises lightweight, good corrosion resistance, retains strength at high temperatures, high dimensional stability, high electrical and thermal conductivity, high dimensional stability, etc.

Many aluminum castings manufacturers, aluminum castings suppliers, and exporters are engaged in offering high quality aluminum castings.
