

Magnetic Destoner

Product Description

Magnetic Destoner as the name represents, it is perfect equipment to eliminate stones utilizing its magnetic action. This equipment is particularly very significant in food industries for removing the stones from the food materials such as grains, pulses, etc. Magnetic Destoner is particularly equipped for eliminating ironstones, mud balls & other iron impurities from rice, wheat, dal, Chana, soya, and many other commodities.

Power Magnetronics is one of the leading manufacturer and exporter of magnetic destoner across the globe. Our manufactured magnetic destoner is specially designed for removing mud balls and other iron impurities which can be found in wheat, dal, and other pulses where high-intensity magnetic destoner are hugely used. It is having good performance for removing mud balls for gaining 100% accuracy after passing the material on Magnetic Destoner.

This equipment saves time as it has high productivity and is easy to operate. This advanced Magnetic Destoner is utilized to remove sand particles, fragmented stones and various other contaminants or impurities present in all sorts of grains. Our products have excellent properties such as sturdiness, durable life, ideal finishing, etc. The Destoner is manufactured as per client requirement for handling all cereals, some species, pulses, legumes, and industrial materials such as; plastics, chemicals, and minerals.

Further these products are reliable, user-friendly, efficient, and passed through every stage of quality monitoring. They save time with its user-friendly operation and high productivity. We are capable to fulfill customer demand by offering a magnetic destoner with a wide variety of designs and sizes. We can also offer to customize magnetic products as per customer specifications and requirements.

Advantages

- Low Power Consumption.
- Increases life of rubber rolls.
- Increases life of polishing rolls.
- It offers high production capacity.
- Easily separates black stones from the material.
- Magnetic Destoner used to differentiate metal particles, mud balls, and other impurities from grain.

Application

- Seeds Industries
- Grains Industries
- Food Industries.
- Spices Industries
- Pulses Industries
- Granules Industries
