

# Electromagnetic Lifter

## Product Details:

Copper wound            75% or 100%

Voltage            220 V

Power source   Electricity AC and DC

Diameter           100 mm to 500 mm

Brand   Erich magnetics

We are engaged in offering Electromagnetic Lifter that are extensively utilized for workshop use. These comprise of a gear which enables lifting and positioning. These can be affixed to a large number of cranes and have a high lifting capacity. The surface of the magnet is highly resistant to abrasion or any other form of damage. The powerful magnet is made available in different diameters so as to fulfill the various industrial requirements. These are highly power efficient and have been tailored for long term usage. These are supplied with built-in rectifier and switch to to operate on 220 V A.C. single phase supply. Other voltage as per request.
