

## Pneumatic Feeders

Samay-Asia High Precision Pneumatic Feeder is a Perfect match of superior quality material and technically advanced design. It is developed under strict quality control parameter for automatic feeding of metallic and none metallic coil material and provides high feeding speed with accuracy for a longer time which makes it reliable and pocket friendly.

### Special Features :

- Accuracy: 10 microns in proper working conditions.
- Made from special alloy aluminum.
- Low air consumption.
- Easy to install & simple to operate.
- 100% additional performance.
