

# Electronic Extensometer

Mechatronic Control Systems offers electronic extensometer MEE 2 to measure material extension with a resolution of one micron. Strain gauge type extensometer to be used up to elastic limit to determine important parameters like 0.1%, 0.2% proof stress and Young's Modulus. This requires Mechatronic make Electronic Control Panel

Model: Mech CS.EE2

Brand: Mechatronic

Applications: Extensometer

Industries: Aerospace, Automotive, Electronics, Inks and Coatings, Metal Packaging

Materials: Aluminum, Steel
