

Hydraulic Breakers

Small Breakers are perfect for demolishing light concrete structure and asphalt pavements. The Medium Breakers are ideal for concrete and asphalt demolition work, secondary rock breaking and primary rock excavation at construction and mining sites. Our Heavy Breakers are highly adapted for primary blast-free rock excavation and secondary rock breaking at construction and cement/limestone mining sites.

Description

- Machine DataLB 400
- Delivery Weight360 kg
- Suitable carrier weight class5-9 tonnes
- Working tool diameter80 mm
- Start up modeAuto start
- Hope inside diameter P15 (%) mm(in.)
- Hope inside diameter T15 (%) mm(in.)
- Oil flow60-90 l/min
- Impact rate530-1,000 bpm
- Operating Pressure120-150 bar
- Back pressure acceptance30 bar
