

Hydro Magnets

Hydro Magnets are the best way to pick up valuable scrap metal on-site and turn it into profit. They also protect the workforce and equipment by keeping the ground clear and safe. A hydro magnet attaches easily to any excavator and is ideal for demolition sites, scrap yards and recycling facilities.

Description

- HM rangeHM 1500HM 2000
- Carrier weight class12-30 t15-45 t
- Service weight1550 kg2000 kg
- Product weight1360 kg1650 kg
- A (Fixed/movable version)1025/1580 mm1050/1605 mm
- B280 mm305 mm
- C1060 mm1250 mm
- Generator power13 kW13 kW
- Magnet power6 kW9 kW
- Tearing force11.5 t15.0 t
- Maximum load5.8 t7.5 t
- Oil flow rate (generator activation)90—250 l/min90—250 l/min
- Max. operating pressure (generator activation)350 bar350 bar
- Oil flow rate (magnet plate activation)20 l/min20 l/min
- Max. operating pressure (magnet plate activation)50 bar50 bar
