

Fabrications

Bunny industries are capable of providing stamping, corrugating and roll forming, shearing, embossing, and many other necessary custom metal fabricating services for a variety of materials. Steel and aluminum are the most common metals we custom fabricate, but Advantage Fabricated Metals is capable of working with the most common and many not-so-common metals.

Fabricated Metals services directly benefit Original Equipment Manufacturers, OEMs, by providing them access to the extensive contract metal fabricating services we offer. These custom metal fabricating services include metal stamping, roll forming, punching, press braking, notching, embossing, corrugating, roll forming, shearing, cut to length, welding, assembly and design services coupled with our unique solutions orientation.
