

Screw Conveyors

Screw Conveyor is known for its space efficiency. Its compact design allows for easy integration into existing production lines, making the most of available floor space in manufacturing facilities.

Designed with simplicity in mind, the Screw Conveyor requires minimal maintenance. Accessible components and a straightforward design contribute to reduced downtime and overall operational efficiency.

The helical flighting design ensures a controlled and efficient conveyance of materials, minimizing segregation and degradation.

The function of screw conveyor is shifting the raw material, Chilli powder and other stuffs of spices from one machine to another machine and we are using these screw conveyors for connecting 3 pulverizers in chilli automatic plant and spices automatic plant for shifting the material.

This machine is available in below categories

6", 8", 10", 12", 14", 16" – OD
