

Mops (Spindle)

We can Provide Spindle mounted mop wheels which are widely used for de-burring, cleaning applications in metal fabrication industries and finishing of hard to reach areas such as the internal surface of pipes, cylinders, molds. Quality materials are used thus ensuring safety at high-speed operations. Can be used with pneumatic, electrical hand-held grinders.

APPLICATIONS

de-burring, cleaning applications in metal fabrication industries and finishing of hard to reach areas such as internal surface of pipes, cylinders, molds.
