

Trimming Dies

We are manufacturers and suppliers of all types of Trimming Dies / Trim Dies. These dies are used for Cold forging and Hot forging.

The material used in dies is High Speed Steel / HSS of different grades M2 / 1.3343 / SKH59, M35 or M42. Dies are heat treated to 60 – 62 HRc to give good life.

These dies are used for manufacturing of fasteners / bolts / screws of different head shapes like Hex Head, Round Head, Collar Bolt, Octagonal, 12-corner, T shape or any other special shape as required by the customer.

The dies are normally made on press by cold pressing the shape. Special shapes are made on Wire EDM, Electrode EDM, Wire Cut.
