

Butter Extruder

Welcome to the world of Butter Extruders at SMART ENGINEERING, We are your trusted partner for dairy equipment and solutions, and our Butter Extruders are at the forefront of creating delightful, precisely shaped butter products. Whether you are a small artisanal dairy producer or part of a large-scale butter manufacturing operation, our Butter Extruders are engineered to elevate your butter processing, delivering consistency and innovation that stands out.

THE SIGNIFICANCE OF BUTTER EXTRUDER:

A Butter Extruder is an innovative piece of equipment that transforms butter processing into an art form. It allows you to create uniquely shaped butter portions, adding a touch of elegance and distinctiveness to your products. Whether you are crafting artisanal butter for discerning customers or looking to stand out in the market, the precision and creativity of a Butter Extruder are key.

Capacity : Our Butter extruders starting from 150 kilograms per hour. The choice of capacity depends on the production volume requirements.

Construction Material: Our Butter extruders are made from high quality stainless steel materials to ensure hygiene, durability, and ease of cleaning.

Extrusion Mechanism: Our machines use a mechanical extrusion mechanism to shape the butter. The extrusion mechanism may consist of augers, rollers, or other shaping components.

Extrusion Die or Nozzle: Our Butter extruders come with various dies or nozzles that can be standard to produce different shapes and sizes of butter products.

Cutting Mechanism: Our extruders include a cutting mechanism to trim the extruded butter to the desired length.

Hopper: A hopper is provided to load the butter into the extruder.

TECHNICAL SPECIFICATION

SL NO	MODEL	CAPACITY	ELECTRIC POWER/ PHASE	DIMENSION L x W x H (mm)	WEIGHT
1	SEBE-150	150Kg/Hr	2HP/3PH	2000x500x1500	250KG

BUTTER BLOCK SIZE

100Grms	L (10cm)xW (6.5cm)xH (1.6cm)
200Grms	L (10cm)xW (6.5cm)xW (3.6cm)
500Grms	L (12cm)xW (7.2cm)xH (5.9cm)
