

Temperature Sensors

With group of experienced manpower, we have been involved in this manufacturing since 1992. From 2012 onward we're largest producer of temperature sensors with complete molding & assembly in india. Our manufacturing plant equipped with tornos sliding head, LMW CNC turning machines, haitian injection molding machines for high precision turning & molding and best quality surface finish. With the help of cuttings edge technology & 3D designing & development, we're capable to deliver mass quantity manufacturing over quality.

Material we serve	Brass, SS 304/316.
Industries we serve	automobile, boilers, aerospace, electronics & electrical industries, plastic molding industries.
Tolerance we maintain	0.050 to 0.010 mm
Finish we provide	chrome, nickel
surface roughness we maintain	Ra 0.2 to 0.8 Um
Turning Machines we use	TORNOS SLIDING HEAD, LMW CNC TURNING
Plastic Molding Machines we use	haitian injection molding machine
