

Brass Anchor

SPECIFICATIONS:

Material : Free Cutting Brass

Features : Face fixing, shallow drilling, depth high corrosion and heat resistance.

Characteristics : Internally threaded anchor with metric connecting threads. The Grooved and knurled anchor sleeve expands by turning in the screw.

Applications : End Expansion in solid building material. Brass Anchors are multifaceted components and are able to work any surfaces like brick, concrete, metallic or timber based surfaces, Fixing mechanical services, Cable trays, Platforms, Drain covers, Suspended ceilings, etc.

Installation : Drilling with depth gauge rod. Clean the drill hole Insert the brass Anchor with pre-assembled screw into the drill hole until the screw head is flush to the building materials. Tighten the screw with accuracy (Anchor will be retracted a little from the drill hole).
