

Flow Switch

Description

A Flow switch is normally a simple device that monitors flow and sends a trip signal to another device such as a Pump to protect it. Flow switches are used for Pump protection, Cooling Circuit protection, high & low flow rate alarm and general flow monitoring.

Specifications

Certification CE Certified

Voltage 200VDC

Frequency 50HZ

Fluid Liquid & Gas

Density Upto 2.95

Viscosity Upto 20 cp

Warranty 1 Year
