

Rotameter

Perna Enterprises is one of the leading **Rotameter manufacturers, suppliers and traders in Pune, Mumbai, Kolkata, Delhi, India, UK, UAE, and Dubai**. To bring the best quality rotameter at the best prices in the market, our expert team is highly engaged in manufacturing it by using latest and innovative technology. The superior quality raw materials and components are used for it. We are highly appreciated by our valued clients for our productivity and timely delivery. We ensure to provide an extensive range of rotameters to worldwide industries in a short time period.

Rotameter is an instruments used to measure volume or flow rate of the fluid in closed tube. It consists of tapered tube and float. The main advantage of our rotameter is that it does not require any external electric power. Our rotameters are simple in construction, compact, reliable, cheap and durable. They are also easy to use and install.

Applications:

Rotameters are widely used in laboratories and various plants.
