

PH Meter

Prerna Enterprises is one of the leading Online pH Meter manufacturers, suppliers and exporters in Pune, Mumbai, Kolkata, Delhi, India.

With the help of latest technology, Our team design embedded microcontroller based online ph meter for various measurement applications.

We offer this premium quality online PH meter at best prices. Owing to its quality and performance, we are highly appreciated by our valued clients. We provide an extensive range of these meters in various specifications as per customer's requirements.

What is online pH meter and how it works

An online pH meter is an analytical instrument used for continuous monitoring and measurement of the pH (acidity or alkalinity) of a liquid solution

pH meters that are portable and used for spot-checking, online pH meters are designed for real-time, continuous monitoring in various industrial processes.

Technical specifications:

Input Voltage	230 V, AC
Range of pH	0 to 14
Frequency	50-60HZ
Mounting	Control Panel
Usage	Laboratory , pharmaceutical etc

Applications:

Water treatment plants
Power plants
Pharmaceutical
Food industry
Chemical
Chemical manufacturing
Food and beverage production

Features and benefits:

- Compact and lightweight design
- Portable, reliable
- Highly accurate
