

# Flow Meter

Saitech Flow Meter on our expansive delivery network, we are **Flow Meter Manufacturing** and **Flow Meter** supplying an exclusive array. These **Flow meter** are manufactured at our vendors' sophisticated manufacturing unit by employing optimum quality raw material and components in Pune, Maharashtra, Odisha, Bangalore, and Tamilnadu, India.

We specialize in manufacturing and supplying an industrially verified assortment of flow meters that are utilized in several industries for measurement purposes applications. Broadly appreciated by our clients for their consistency and strength, these **flow meter** are presented to our clients in standard and customized forms.

- Line Size: 4mm to 200mm
- Power Supply Range: Battery / 24VDC Power Supply
- Output Current Range :4-20mA
- Accuracy range : +/- 1%
- Provides Direct measurement of volume and flow rate
- Available with Long meter life and reliability
- Provides measurement of low viscosity liquid

Being an old and established technology, **Flow meter** is used extensively wherever low viscosity liquids or gases are flowing inside pressurized closed pipes.
