

## Digital Magnifier

Accurate & detailed inspection with dynamic range of magnification levels and integrated LED illumination. Its versatile design makes it compatible with a wide range of mounting options. Real-time on-screen dimensioning is provided by integrated XY grids and cursors.

The Inspex HD 1080p is suited for repair & rework, quality control & failure diagnosis processes in industries such as: Medical device manufacturing, Electronics, Automotive, Aerospace, Engineering, Forensics and Watch and Jewellery manufacturing.

Less operator fatigue & improved production efficiencies due to ergonomic design enabling user to sit or stand in a comfortable and safe posture providing relief from back, neck and eye strain typically associated with traditional microscopes.
