

Washers

Vijay Brass Industries manufacturer and exporter of washers, bi metal washers, fibre washers, sealing washers, speaker washers, aluminium washers, bush washers, copper marine gasket, copper washers lock washers cup washers.

There are many different types of washers for a variety of applications. Lock washers are used to secure fasteners. Spring washers are a load bearing device that provides a preload between two surfaces.

Other common types include flat washers, C-washers, D-shaped washers, countersunk or finishing washers, fender washers, SAE washers, torque washers, and shoulder washers.

Fasteners would not be complete without washers in various metals and plastics.
