

## Drop Forged

The drop forged bench vise was developed on the Request of one of European client.

We have supplied these vices in huge quantities to eurpoen country the USP of these vices are the availability of Swivel base, The pipe clamping jaws, The relacebale or permanent jaws.

The forging manufacturing process along with production process are which gives durability to these vices.

These vices are also popular in DIY market as mounting is fairly simple on wooden desk ,even at home it could be used.

Also presence of pipe clamp jaws which could be selected at the time of ordering comes as extra tool to clamp cylindrical shafts for cutting or threading applications used to thread or cut pipes upto 60 Dia.

The machining of these vices is done on VMC machine to get the even touching /mating surface resulting in smooth moment for the complete working range of vice.
