Infrastructure

Hi-Tech Pipes Ltd. has its state-of-the-art manufacturing plant in national capital of India-New Delhi. Equipped with all the latest machines and sophisticated testing equipments, we are capable of producing products, which can fulfill different requirements of our clients. We possess Six 4-Hi cold rolling mills, which can produce table top finish material having close tolerance to thickness, shape and flatness. Further, we have a bell type annealing furnace for superior surface finish and skin passing mill, which ensures sufficient pinch pass. Different other equipment at our plant include - spectrometer, metallurgical microscope, rockwell hardness tester, erichsen testing machine, universal testing machine, roughness tester, vickers hardness tester, hydrostatics tester and bend testing machine. In Tubes Division, we have installed a variety of state-of-the art high speed tube mills capable of producing best quality Tubes/Pipes including Hollow Sections, Precision Tubes as per BIS (Bureau of Indian Standards) and various other International Specifications. All the above coupled with High-End HR Slitters, Auto Cut-to-Lengths/shears/trimmers, Cold Saw Cutting, Sheet Corrugation etc. To meet all kinds of needs of our clients.

Research & Development

The secret of our achievements and growth has been our ability to develop, adapt and adopt the latest technology, matching the ever-changing demands of our diverse clientèle. We possess a fully equipped research laboratory with all the latest equipments. Innovativeness and refining of processes is a major strength of our research team, which has always helped in producing innovative products that can beat market competition.

Quality Assurance

In our philosophy, quality is not only the durability and defect free nature of product but its utility and applicability to satisfy the sole purpose for which it was bought. Thus, we are committed to produce products, which can satisfy different requirements and purposes. We, at Hi-Tech Pipes Ltd. have adopted stringent quality control measures to ensure superior quality and zero defects products. Quality is checked at different stages of production and supply and the raw material we use is sourced only from reliable and established vendors. We believe in the philosophy of Total Quality Management and Customer Relationship Management for motivating our employees to achieve organizational goals and to offer maximum customer satisfaction.

Timely Delivery

Over these years of our inception, we have earned reputation as a timely and reliable supplier of products. We have adopted innovative system of production and inventory management, through which we can save time & meet immediate and bulk requirements of our customers. Our innovative methods also helps to cut costs on unnecessary things and thus enable us to cost-effective solutions to our customers.

Customer Satisfaction

We are a customer oriented company and believe in offering total customer satisfaction. Every employee is dedicated towards this end and all efforts and measures are taken to exceed customer expectations by producing innovative and high quality products, timely delivery, competitive prices and excellent after sales service. We understand the importance of our clients, who have contributed a big hand in our success and so we are always ready to know their needs and problems to serve them better.
